

Hi Eric,

I hope this email finds you well. I wanted to reach out and provide some detailed information about our upcoming token sale. Please allocate enough time to go over the following items:

1. Token sale whitepapers, pitch decks, and token economics, as well as a detailed vesting schedule.

I've included some past blockchain projects' presentations and documentation for your reference.

2. Milestones that data scientists (creators) can withdraw funds from non-U.S. investors.

3. My view from my past projects in terms of the first launch,

Best IEO platforms for our situation: Kucoin, Bybit, Gate.io, and MEXC Global.

4. A detailed vesting schedule.

5. Creating Liquidity Pool & Listing INTELL token into decentralized exchange(Uniswap V3) by doing an airdrop on our own platform.

6. Staking & Farming

Staking for making token price safe and increasing Liquidity Pool

Farming for increasing Liquidity Pool (on Decentralized Exchange - Uniswap V3 LP)

6. A detailed roadmap,

7. Our final target & goal (from my opinion)

- Building whole projects as our vision and mission
- Making INTELL price safe by increasing Liquidity Pool and doing staking
- Showing people project transparency through powerful blockchain service such as vesting service, multi-sign wallet, and LP token Lock and so on

I believe it's crucial that we communicate and collaborate with the marketing team regarding these items. If you have any questions or need clarification on any of the above, please let me know.

Best regards,
Dmitry Eremenko
